

Product Quality Assurance

Recent news stories have cast concerns on product safety of goods manufactured in China, Pacific Cornetta, Inc. (PCI) would like to reassure our customers that our products are safe. PCI is committed to our strict quality assurance program at our production facilities in China. PCI focuses on three disciplines: quality control, raw materials and independent tests.

Quality Control

Our inspection guidelines meet or exceed the National Standards of China and include additional requirements from PCI. PCI's guidelines result in higher quality standard than required by the government and most of our customers. At our production facilities, we have a team of QC inspectors performing quality checks on all incoming materials, semi-finished goods and on final products to ensure the goods meet our quality requirements.

Raw Materials

To make certain final products meet our quality standards, we select only food-contact safe materials for use on our products. Materials such as 18/8 marine-grade stainless steel, silicon, polypropylene (PP), acrylonitrile butadiene styrene (ABS) and acrylostyrene (AS) are considered safe materials for our beverage or food containers. All materials do not contain Bisphenol-A (BPA). We require our factory to use only virgin materials and organic pigments for our plastic products. Through careful selection of our suppliers and development of long term relationships with them, our trusted partners supply materials with good quality and consistency.

Independent Tests

As a company policy, our suppliers provide necessary testing reports, such as heavy metal content test, on raw materials for production. During manufacturing, our products are sampled and tested regularly by internationally recognized, independent testing centers. These tests are in addition to the lab tests requested by our customers to ensure that the raw materials we use are always exceeding their standards. Our products are approved by U.S. Food and Drug Administration (FDA) and Japan's Ministry of Health.
