For Immediate Release

PACIFIC CORNETTA LAUNCHES 12oz STAINLESS STEEL WATER BOTTLE

The Liquid Solution® 12oz Cascade Jr. is the newest addition to the company's line of stainless steel water bottles.

Tualatin, Ore. January (2009) – Pacific Cornetta, Inc. today announced the release of the newest addition to the [Liquid Solution®](#) line of stainless steel water bottles. The Cascade Jr. 12oz bottle follows the August 2008 release of the 22oz Cascade Stainless Steel Water Bottle. The new bottle will be available in Spring 2009 at quality retailers nationwide and at www.active-gear.com.

The product responds to consumer concerns regarding harmful chemicals in many water bottles already on the market. The Cascade Jr. is safe from chemicals such as BPA that can leach into the contained liquid. "Today's parents are concerned about the health of their children and are committed to teaching them environmentally friendly practices," said Alex Liu, president of Pacific Cornetta. "These consumers can rest assured that this product is safe, easy and fun for their children – and better for the environment too."

The Cascade Jr. Stainless Steel Water Bottle features single-wall, 18/8 marine-grade stainless steel construction with a BPA-free plastic screw top lid. The lid features a loop for easy attachment to pack clips or straps. Future designs will include illustrations for children and the *Snappy Sip* lid which allows easy, spill-free drinking.

The Cascade Jr. will be available in multiple colors and designs making it fun for the young and the young at heart. "We wanted a bottle that would meet the needs of children but also serve the adult population," said Liu. "We incorporated aspects from the 22oz bottle and are including designs that will appeal to children in order to meet the needs of multiple consumer segments."
